CAB Abstracts is the leading English-language bibliographic information service providing access to the world’s applied life sciences literature, through abstracts and access to full text.

CAB Abstracts gives researchers access to 8.5 million records from 1973 onwards, with over 360,000 new abstracts added each year.

**who uses CAB Abstracts?**

CAB Abstracts is used by hundreds of the world’s leading institutions, including 75% of US land-grant universities, together with many of the premier universities and research centres from across the globe. CAB Abstracts is truly the first choice for agriculture and related applied life sciences.

**Access to Full Text**

Full text is an integral part of CAB Abstracts. Over 35% of records added per year link to free full text available in open access documents or in the CABI full text repository.

**More core serials than any other database**

A study published in the IAALD quarterly bulletin revealed that CAB Abstracts covered more serials identified as core journals in agriculture than any other database that was examined.

- CAB Abstracts covers over 8,000 serials.
- Over 3,100 of these are not available on Scopus.
- Over 3,100 of these are not available on Web of Science.
- Over 5,200 of these are not available on Biosis.
- CAB Abstracts also covers more unique serials in agriculture and the applied life sciences, ensuring users have access to all relevant research.
As well as indexing thousands of core scientific journals, CAB Abstracts offers extensive coverage of grey literature from around the world including:

Annual Reports / General Reports / Books / book chapters / Handbooks / Bulletins / Monographs / Conference proceedings / Newsletters / Discussion papers / Technical information / Field notes / Theses / Posters.

The international focus of our CABI full text repository means that your users have access to a wide crosssection of global research, giving the complete picture they need. All areas of the world are represented, including developing countries.

**COVERAGE**

- Agricultural engineering
- Applied economics and sociology
- Animal production
- Animal health
- Animal nutrition
- Aquaculture
- Biofuels
- Biosafety and bioterrorism
- Biotechnology
- Breeding
- Chemistry
- Climate change
- Crop science and grasslands
- Ecotourism
- Entomology
- Environmental science
- Food science and technology
- Forestry
- Genetics
- Helminthology
- Leisure and tourism
- Medicinal plants and pharmacology
- Microbiology
- Mycology
- Natural resources, land/water management
- Nematology
- Organic and sustainable agriculture
- Parasitology
- Plant pathology
- Plant protection
- Postharvest
- Protozoology
- Soil science
- Veterinary medicine
- Virology
- Waste management
- Horticultural science
- Human nutrition
