More than 300 Electronic Journals, Books, and Databases Covering Cardiology!

Cardiovascular disease is the world’s #1 cause of death. In fact, the World Health Organization estimates that more than 17.3 million people died of cardiovascular disease in 2008—roughly 30% of all deaths. It is expected to remain the world’s leading cause of death as the major causes—tobacco use, physical inactivity, and an unhealthy diet—see no signs of abating. In addition, expanding populations of older people worldwide will require more cardiovascular care.

Ovid gives your users quick, easy electronic access to premium offerings in Cardiology from Lippincott Williams & Wilkins, Oxford University Press, Future Medicine, Sage, Wiley, Elsevier and other publishers. Over half the cardiology journals on Ovid are ranked by Impact Factor. Six are in the top ten and 13 are in the top 20*.

Did You Know?

- Ovid exclusively offers 11 journals from the American Heart Association (AHA) including Circulation ranked 1st by Impact Factor among 122 journals in the Cardiac & Cardiovascular Systems subject category, and are available as ala carte as well as a cost-effective bundle
- Close to 200 books, nearly 50%, have Doody’s Star Rating
- Over 75 cardiology journals - more than 40% are published by Lippincott Williams & Wilkins and are exclusively on Ovid for institutions

OvidSP
Transforming Research into Results.
OvidSP is your complete online research solution, offering a single online destination where you can search, discover, and manage the critical information you need to streamline your research productivity and your work.

- Work the way you want to work with a variety of search modes and customizable work productivity and content alerting tools
- Save and manage critical research findings and documents in a dedicated work area—My Projects
- Extend your Ovid research experience beyond OvidSP with the Ovid Toolbar
- Search all Ovid resources—books, journals, and databases—simultaneously with just one query

Core Journals, Books, and Databases

Journals

**Circulation**, Lippincott Williams & Wilkins  
*Impact Factor 15.202, 1/122 (Cardiovascular Systems); 1/67 (Peripheral Vascular Disease)*  
*Impact Factor 14.097, 2/122 (Cardiac & Cardiovascular Systems)*

Circulation publishes the most important papers from across the world of cardiology every week. Publishing a combination of basic, translational, clinical, and population research, the journal publishes the most authoritative articles and details the implications for application in practice to improve patient outcomes.

**Circulation Research**, Lippincott Williams & Wilkins  
*Impact Factor 11.861, 4/122 (Cardiovascular Systems); 1/67 (Hematology); 2/67 (Peripheral Vascular Disease)*

Each biweekly issue of Circulation Research explores some of the most revolutionary research from areas like cellular therapy/stem cells, microRNA biology, development, proteomics, translational research, and more.

**European Heart Journal**, Oxford University Press  
*Impact Factor 10.400, 5/122 (Cardiac & Cardiovascular System)*

Aims to publish the highest quality material, both clinical and scientific, on all aspects of Cardiovascular Medicine. It includes articles related to research findings, technical evaluations, and reviews.

**Nature Reviews Cardiology**, Nature Publishing Group  
*Impact Factor 10.400, 5/122 (Cardiac & Cardiovascular System)*

Highly illustrated, Nature Reviews’ clinical content is written by internationally renowned clinical academics and researchers and targeted towards readers in the medical sciences, from postgraduate level upwards.

Cost-effective journal collections are also available!

Books

**Feigenbaum’s Echocardiography**, Lippincott Williams and Wilkins  
*Doody's Star Rating®: 5 stars, score: 100; Doody's Core Titles: 2.8 – Cardiology*

This thoroughly revised seventh edition reflects recent changes in the technology and clinical use of echocardiography.

**Hypertension: Atlas of Investigation and Management**, Clinical Publishing  
*Doody's Star Rating®: 5 stars, score: 100*

This is the first volume of a new series of titles, each of which provides readers with a concise and carefully-structured pictorial reference to the clinical manifestations of disease and the means by which the diagnosis may be confirmed.

**Kaplan’s Clinical Hypertension**, Lippincott Williams & Wilkins  
*Doody's Star Rating®: 4 stars, score: 92; Doody's Core Titles: 2.6 – Cardiology*

This best-selling clinical reference by a world-renowned authority on hypertension was listed as the #1 reference book for hypertension by the American Society for Hypertension in 2006.

**Physical Exam of the Heart and Circulation**, People’s Medical Publishing House—USA LTD  
*Doody's Star Rating®: 5 stars, score: 100; Doody's Core Titles: 2.5 – Cardiology*

In the fourth edition of this outstanding resource, emphasis is placed on the physical examination, rather than physical diagnosis. The author’s objective is to describe the physical signs and how they are elicited.

PLUS! LWW Cardiology Book Collection of over 80 premium books.

Databases

**MEDLINE**, National Library of Medicine  
The full MEDLINE® for the Ovid platform is updated daily and includes access to Ovid MEDLINE In-Process & Other Non-Indexed Citations, Ovid’s collection of non-indexed NLM records, both the in-process and PubMed-not-MEDLINE records.

**Embase**, Elsevier  
One of the leading sources of pharmacological and biomedical literature includes more than 12 million records drawn from nearly 5,000 journals published in 70 countries. With powerful indexing, seamless mapping to controlled vocabulary terms, and more.

**Current Contents® - Clinical Medicine**, Thomson Reuters  
This database provides easy access to complete tables of contents, abstracts, bibliographic information and all other significant items in recently published editions of over 1,120 leading journals.
