Book News

ALTERNATIVE & COMPLEMENTARY MEDICINE: HERBALISM-HERBAL & NATURAL REMEDIES
Assists clinicians in counseling patients about use of herbal and dietary supplements and integrating these supplements into the comprehensive clinical management of common conditions.

ALTERNATIVE & COMPLEMENTARY THERAPY: MANIPULATIVE THERAPY-GUA SHA
This book consists of an introduction to the essential theories of Gua Sha (repeated pressured strokes over lubricated skin with a smooth edge, such as a ceramic Chinese soup spoon, a well-worn coin, even honed animal bones, water buffalo horn, or jade), commonly used tools, basic procedures, practical applications, and typical, illustrated case studies.

ALTERNATIVE & COMPLEMENTARY THERAPY: MANIPULATIVE THERAPY-MASSAGE THERAPY
Covers the origin, development, conception, and function of foot reflex zone massage, as well as its relations with other therapies, rudimentary essentials, and medical principles.

With illustrations, rich content, and clear explanations, this is a useful reference for clinicians and students, as well as those interested in self care and treatment, looking for support on cupping therapy, which involves placing cups containing reduced air pressure (suction) on the skin.

BEHAVIORAL & SOCIAL SCIENCES: PSYCHOLOGY
Anxiety disorders are among the most prevalent mental health problems in childhood and adolescence—and this is an authoritative guide to the understanding and assessment of anxiety disorders in the young.

Each of the five sections in this book examines the relevant concepts, spanning from factors that contribute to and promote resilience, to populations and societal systems in which resilience is employed, to specific applications and contexts of resilience and interventions designed to better enhance resilience.

PSYCHOLOGY-CLINICAL PSYCHOLOGY
Written and edited by leading experts in the field, this authoritative text defines international best practice and is an important resource for psychiatrists, clinical psychologists, primary care doctors and those responsible for establishing health policy.

CLINICAL MEDICINE: ANESTHESIOLOGY
Dissects the nature of complications and helps anesthetists and anesthetic practitioners understand, avoid and manage them efficiently.

Here’s a practical quick-reference handbook giving step-by-step instructions for the management of the most common anaesthetic crises encountered in the OR.

Essential Anesthesia; Euliano, T.Y.; Gravenstein, J.S.; Gravenstein, N.;
A concise, accessible introduction to anesthetic practice for medical students, junior doctors, and all operating theatre and critical care staff.

The most practical clinical pearls on what to do and how and when to do it are presented in concise outline format, with hundreds of tables, graphs, and algorithms that summarize and prioritize crucial points.

CLINICAL MEDICINE: CRITICAL CARE MEDICINE
Each topic addressed in this volume contains both essential diagnostic and treatment information and discusses the implications for intensive care management, obviating the need to refer to specialized sources.

CLINICAL MEDICINE: DERMATOLOGY
This book brings together top dermatologists around the world to address the complicated and multifaceted field of dermatologic emergencies for the practicing dermatologist and emergency physician.

CLINICAL MEDICINE: INTERNAL MEDICINE: ENDOCRINOLOGY & METABOLISM

Demystifies the subject of arrhythmia with a straightforward approach to rhythm abnormality, asking how the patient with arrhythmia presents, how the problem should be investigated and how the arrhythmia can be managed.

Provides a crisp and accurate summary of lipid disorders using clear language and illustrations.

In this updated fourth edition, two authors of international renown provide a practical evidence-based approach to the diagnosis and management of the condition.

Provides an up-to-date account of this common yet easily missed condition. The highly illustrated book is an excellent clinical resource for the primary care team, gastroenterologists in training and anyone who wants to know more about this challenging disease.

Focusing on the diagnosis and treatment of both types 1 and 2 diabetes, this completely revised third edition will prove invaluable to primary care physicians, specialist nurses, junior doctors and medical students alike.

CLINICAL MEDICINE: INTERNAL MEDICINE: NEUROLOGY

Specifically aims to provide the primary care physician and other members of the healthcare team with the information they need to recognize and evaluate dementia and to provide optimum management and long-term care.

A succinct and practical aid to the diagnosis and treatment of seizure disorders
Provides doctors, nurses and therapists with rapid access to the most up-to-date relevant information, with the aim of providing optimum care and improving the lives of all patients with Parkinson’s disease and related disorders.

This colorful easy-to-read, yet evidence-packed, book provides a perfect overview to bring a reader up to speed with this vitally important area of pain management.

Delivers concise and highly practical information on all aspects of this all too common disease.

This clearly written and succinct handbook provides an invaluable update on a fast-changing area for all those who provide support and care for men with prostate cancer, from the primary care team to the specialist.

Arranged alphabetically by cancer type, this quick-reference guide contains combination as well as selected single-agent regimens for solid tumors and hematologic malignancies.

What is Glaucoma? How can it be detected? How can it be treated? Fast Facts: Glaucoma answers all of these questions.

Now in its third edition, this volume delivers a clear practical message: improved asthma control can be achieved through efficient commonsense delivery of asthma care.

An invaluable resource for all healthcare professionals, full of practical information on the early recognition, stabilization and successful management of this multifaceted disease.

This new edition provides the family physician and other members of the healthcare team with the latest information for the successful
management of this challenging condition.

This thoroughly updated second edition provides an easy-to-read overview of how the condition is thought to develop and how it is diagnosed, monitored and treated.

Provides a comprehensive and authoritative review of the current practice in diagnosis and management of these cerebrovascular disorders.

Summarizes our current knowledge of small vessel disease—a cause of strokes—bringing together expert research from global authorities in the field.

Provides a practical, problem-oriented manual to help clinicians with diagnosis, evaluation and management.

This book includes chapters on specific acute neurologic diseases including stroke, epilepsy, neuromuscular disease and traumatic brain injury and also addresses common reasons for neurologic consultation in the hospital including encephalopathy, electrolyte disturbances and neurologic complications of pregnancy.

Focuses on the most difficult diagnostic problems in breast disease for the surgical pathologist: needle core biopsy interpretation, diagnosis of precursor lesions and early stage disease, recognition of neoplastic mimics and other misleading variants, and more.

This volume provides a practical overview of the ethical issues arising in pediatric practice, and is an essential resource for all physicians who care for children, as well as medical educators, residents, and scholars in clinical bioethics.

Written by leading experts in the field, this book provides a comprehensive overview of the causes and implications of obesity, and is packed with practical advice on the assessment and management of the obese patient.

This atlas is a comprehensive, hands-on guide to more than 100 medical procedures most commonly performed in an office setting.

Here’s an essential and up-to-date guide for mental health professionals of all disciplines as well as medical students and trainees.

A highly accessible synopsis of current understanding of and strategies for bipolar disorder.

Completely rewritten by new authors, this third edition provides concise and clear descriptions of the features, identification and management of depression; presents the wider context of cause, cost, distribution and risk; and summarizes the latest evidence that underpins good practice in this area.

A visually dynamic atlas, packed full of over 300 images of a broad spectrum of pathologic entities and emergency conditions.

A practical text enabling radiologists to maximize the benefits of high field 3T MR systems in a range of body applications.

Brings together some of the world’s leading clinical experts in fluid management to explain what you should know when providing infusion fluids to surgical and critical care patients.

This is a practical, concise introduction to what is rapidly becoming an essential tool for all critical care physicians: bedside emergency ultrasound.

This user-friendly book includes basic information often omitted from other texts: a practical method of image analysis, sample dictation templates and didactic information regarding lesions/diseases in a concise outline form.

Teaches practitioners how to motivate and instruct patients on the importance of exercise and how to design practical exercise programs for patients of all ages and fitness levels, as well as those with special conditions such as pregnancy, obesity, and cancer.

Written by expert transplant surgeons, anesthetists and physicians, this is an invaluable multidisciplinary resource for any clinician involved in transplantation, providing in-depth knowledge of specialist areas of transplantation and covering the full range of management strategies.

There is important work to do to raise awareness of men’s health issues in general and the problem of BPH in particular. Lower urinary tract symptoms are among the commonest reasons for a man to consult his doctor, and this ever-popular book remains a must-read for all primary care providers.

Three internationally recognized authors with different areas of have ensured that this second edition is internationally relevant to the non-specialist working within a multidisciplinary team.

Written specifically for readers seeking entry into this fast-moving, complex specialty with a solid understanding of the subject.

Applying the principles of adult learning, the authors provide examples of how to design a successful lecture and teach the reader how to influence the behaviors of their audience.

This book helps the orthopaedic surgeon preparing for the written part of the FRCS (Tr and Orth) examination.

Examines in detail how doctors protect patients’ interests, implement morally controversial change, manage colleagues in difficulty, and rebuild trust after serious medical harm.
TRADITIONAL CHINESE MEDICINE: ACCUPUNCTURE/MOXIBUSTION/TUI NA
Acupoint locating is a critical component of therapeutically effective needling treatment. This book is an ideal reference for acupuncture practitioners, TCM college students, and acupuncture enthusiasts. All photos are taken from real human bodies for a true-to-life effect.

This book, with colored illustrations, serves as a sharp tool for those who prefer to deal with common conditions using tuina manipulation, and introduces easy-to-administer tuina methods for 66 common diseases.

TRADITIONAL CHINESE MEDICINE: TCM CLINICAL MEDICINE-TCM DIAGNOSIS
This book covers the history of tongue diagnosis, techniques and methods, physiological variations of the tongue, tongue coating, and more.

New Book Editions
CLINICAL MEDICINE: GENETICS & GERONTOLOGY
This comprehensive textbook for both undergraduate and graduate level courses details the impact of societal forces on the aging process. The 4th edition now includes significant changes in social gerontology.

CLINICAL MEDICINE: NEUROLOGY
Clear and easy to read, the second edition has been updated to include recent research findings, and provides practical tips on working with your doctor to find the best treatment for your headaches.

CLINICAL MEDICINE: OCCUPATIONAL & ENVIRONMENTAL MEDICINE
The second edition includes a new chapter on injuries, an expanded discussion of the history of environmental health, and a new case study on pandemic influenza.

CLINICAL MEDICINE: RADIOLoGY
Many new images, expanded content, and full-color throughout make the fourth edition of this classic text a comprehensive review that is ideal as a first reader for beginning residents, a reference during rotations, and a vital resource when preparing for the American Board of Radiology examinations.

CLINICAL MEDICINE: UROLOGY
Written by two prominent urologists, with “insider” advice from actual patients, this book is an invaluable resource for anyone coping with the physical and emotional turmoil of these sometimes debilitating conditions.

HEALTH PROFESSIONS: CHIROPRACTIC
The fourth edition of this best-selling reference is a compendium of evidence-based approaches to the most common presenting complaints.

NURSING: ADVANCED PRACTICE
The Clinical Nurse Specialist Handbook, second edition is a comprehensive resource designed exclusively for clinical nurse specialists. Completely revised and updated, it delves more deeply into topics covered in the first edition.

NURSING: ADVANCED PRACTICE
Newly revised and updated, this book features two new chapters on monitoring maternal heart rate patterns and legal issues involved in care, new fetal monitor “strips,” and updated visual materials, references and resources.
Developed within a holistic, caring framework, and well grounded in theory and research, the second edition continues to provide a unique and comprehensive look at forensic nursing from an interdisciplinary perspective, and addresses the need for collaborative practice and skill in caring for victims of violence and disaster, as well as in competently assisting in investigations.

This fully revised new edition provides well-organized, concise, and easier-to-access evidence-based practice guidelines for use in community and ambulatory settings. It has been written by nurse practitioners with over 90 years of combined experience in women’s health, and integrates the knowledge of noted experts for each topic.

**NURSING: ANESTHESIOLOGY**
Providing thorough information for all anesthesia providers, the easy-to-read and easy-to-use second edition includes general anesthesia principles, obstetrics, pediatrics, regional anesthesia, and medication charts.

**NURSING: GERONTOLOGY**
Each chapter in this newly revised edition has new references, a new case study, and an evidence-based practice box. There’s also new information on how the Health Care Reform bill has affected care of the adult with chronic illness.

Thoroughly revised and updated, the fourth edition provides comprehensive, concise, evidence-based information on diagnosis and treatment of disorders of the elderly patient.

This book addresses all regulatory pieces of information to provide readers with an overview of the entire process of managing a nursing facility. This edition has been updated to reflect the most accurate and up-to-date information to reflect new legislation and regulations passed since previous edition in 2008.

Presents the latest federal guidelines and protocols used by federal surveyors in certifying facilities for participation in Medicare and Medicaid funding.

**NURSING: ISSUES AND TRENDS IN NURSING**
This 10th edition of a classic textbook for graduate and advanced undergraduate students presents the critical issues and core challenges surrounding our health care system.

**NURSING: LEGAL ISSUES**
The fourth edition has been completely revised and updated. Each case study allows readers to develop their own approaches to the resolution of ethical conflict and to reflect on how the traditions of ethical thought and professional guidelines apply to the situation.

Now in its fourth edition, this bestseller continues to provide a solid foundation for students and practicing nurses to build confident and effective practices.

**NURSING: MANAGEMENT & ADMINISTRATION**
The fourth edition has been completely revised and updated and reflects all new delegation laws and policies, current evidence-based research that supports the efficacy of team work and delegation in clinical settings, unit-based care delivery modalities, step by step.
step methods to stay safe while using assistive personnel, new information on Magnet Status for hospitals, and an entirely new resource section.

NURSING: MEDICAL/SURGICAL

This new edition explores the intersection of scientific, creative, and spiritual ways of knowing that inform and inspire this “healing presence” in caregiver and patient.

NURSING: NURSING EDUCATION

This fourth edition of a “survival manual” for new teachers offers the most current thinking in nursing education, from practical nursing, to baccalaureate and master’s programs.

NURSING: NURSING PROCESS & DIAGNOSIS

This text contains all the major diagnoses listed by the North American Nursing Diagnosis Association (NANDA)—standard diagnoses that are meant to create a standard plan of care for patients with any range of ailments.

PHARMACOLOGY: PHARMACOLOGY

New for the 2011 Edition include Black Box Warning indications, updated drug content, new figures and tables, and more.

PUBLIC HEALTH: HEALTH ADMINISTRATION

This completely updated edition presents the state-of-the-art protocols currently used at the MD Anderson Cancer Center and thoroughly explains the principles, nomenclature, and clinical use of intensity-modulated radiotherapy (IMRT).

CLINICAL MEDICINE: GERIATRICS & GERONTOLOGY
Current Aging Science; Lahiri, Deborah K.; Bentham Science Publishers Ltd., ISSN: 1874-6098; Vol 1 #1 (2008) - Present
Publishes frontier review and experimental articles in all areas of aging and age-related research that may influence longevity.

CLINICAL MEDICINE: NEUROLOGY
Neurodegenerative Disease Management; Future Medicine; ISSN: 1758-2024, eISSN: 1758-2032; Vol 1 #1 (2010) - Present
This peer-reviewed journal provides guidance to the multidisciplinary disease management community regarding the most effective treatment strategies and the implications of cutting-edge research as it emerges.

CLINICAL MEDICINE: PAIN MANAGEMENT
Pain Management; Future Medicine; ISSN: 1758-1869, eISSN: 1758-1877; Vol 1 #1 (2010) - Present
Presents findings, analysis and commentary on the battle with acute and chronic pain, including guidance to the interdisciplinary pain management community regarding the most
effective pain strategies.

**CLINICAL MEDICINE: PSYCHIATRY**
*Neuropsychiatry*; Future Medicine; ISSN: 1758-2008, eISSN: 1758-2016; Vol 1 # 1 (2010) - Present
Provides a key resource for all physicians and healthcare practitioners who are striving to provide the best possible care for their patients.

**HEALTH PROFESSIONS: DENTISTRY & DENTAL HYGEINE**
*Orthodontics and Craniofacial Research*; Wiley-Blackwell; ISSN: 1601-6335, eISSN: 1601-6343; Vol 1 #1 (2007) - Present
A forum for the presentation and discussion of issues pertinent to the advancement of orthodontics and the evidence-based knowledge of craniofacial growth and development.

**PHARMACOLOGY: PHARMACOLOGY**
*Cardiovascular & Hematological Agents in Medicinal Chemistry*; Bentham Science Publishers Ltd., ISSN: 1871-5257; Vol 2 # 1 (2004) - Present
Each issue contains a series of timely in-depth reviews, original research articles and drug clinical trial studies written by leaders in the field covering a range of current topics in Cardiovascular & Hematological medicinal chemistry.

**Cardiovascular & Hematological Disorders - Drug Targets**; Shen, Garry X.; Bentham Science Publishers Ltd., ISSN: 1871-529X; Vol 4 #1 (2008) - Present
Aims to cover all the latest and outstanding developments on the medicinal chemistry, pharmacology, molecular biology, genomics and biochemistry of contemporary molecular targets involved in cardiovascular and hematological disorders e.g. disease specific proteins, receptors, enzymes, genes.

**SCIENCE: EARTH & GEOLOGICAL SCIENCE-SOIL SCIENCES**
*European Journal of Soil Science*; Wiley-Blackwell; ISSN: 1351-0754, eISSN: 1365-2389; Vol 75 #1 (2005) - Present
Published on behalf of the British Society of Soil Science (and the National Societies of Soil Science in Europe), this is one of the premier journals in the field, and fosters that understanding by publishing the latest significant findings of research, the description of new techniques, and up-to-date authoritative and critical reviews over the whole field of soil science and its applications.

**LWW Nursing and Health Professionals**
*Premier Extended Archive Collection*; LWW
This new collection, a more focused subset of the LWW Extended Archive Collection, expands Ovid’s robust collection of journal archives by delivering a set of issues (Volume 1, Issue to issues published in 2008) for over 60 LWW journals covering a variety of sub-disciplines in nursing and allied health.

**LWW Nursing Extended Archive Collection**; LWW
This new collection, a more focused subset of the LWW Extended Archive Collection, expands Ovid’s robust collection of journal archives by delivering a set of issues (Volume 1, Issue to issues published in 2008) for over 40 LWW journals in critical care nursing, home hospice and palliative nursing, and other nursing sub-disciplines.

All of the journals in this exclusive collection have been selected for their high quality and content currency. Published by the world’s leading sources of medical and healthcare information, they cover a variety of critical topics, including hospital administration, public health, nursing practice, and more.

**Database News**
Ovid recently released great new features to Ovid LinkSolver Resources A-Z (formerly known as Journals A-Z) that will make the user experience even better. Enhancements include:

- **Support for Books** - Books@Ovid, non-Ovid books and book subjects are now supported in Resources A-Z (formerly known as Journals A-Z). Activate your book targets via the LinkAdmin tool to see your books in A-Z
- **Coverage and Edition Information** - See the coverage range for journals and edition information for books in your A-Z display
- **Ease of searching - Use Double Letter Searching** in the “Browse by Title” to easily find your titles
- **Less clicks! Auto-Expand/Collapse** will help you quickly reach the journal or book of your choice
- **Configure your display;** show all resources or select books or journals
- **“Browse by Subject” Title List** is now in alphabetical order

**CAB Global Health Reload**
With this reload, the 2012 Thesaurus Tool will be implemented and the following limits will be available.

**3 New Language Limits**
Belorussian
Luo
Tawahka

**1 New Publication Type Limit**
Bulletin Article

Great news for those of you who subscribe to OvidMD and UpToDate®! Our latest enhancement will enable OvidMD to search UpToDate® in real time and deliver results in the exact same relevance order as UpToDate. You will also notice a much more compact presentation of UpToDate results. Keep in mind that a subscription to UpToDate is required to see beyond...
the 5 paragraph preview in the search results. UpToDate covers more than 9,500 clinical topics in 19 specialties and new topics are added every month. The end result of this enhancement is a balanced search return of UpToDate content, Evidence-Based Guidelines, Ovid MEDLINE®, A to Z Drug Facts, Medical Calculators and much more.

Sternberg’s Diagnostic Surgical Pathology - 2 Volume Set, 5th Edition
Lippincott Williams & Wilkins

Doody’s Star Rating®: 5 stars, score: 100; Doody’s Core Title: 2.93 (Health Sciences -Surgical Pathology),
Essential Purchase Title
This edition once again provides an authoritative treatise on the diagnosis of conditions which confront the surgical pathologist. This edition remains true to this goal, providing surgical pathologists and their trainees with a practice-oriented compendium that can help them diagnose both neoplastic and non-neoplastic conditions.

See the excerpt below of an expert review from Doody’s Review Service (www.doody.com/drs) written by Ivan Damjanov, MD (University of Kansas Medical Center)

“The new edition has retained all the attractive features of the previous editions that have made this book so popular with surgical pathologists. It is hard to find another book in which so much knowledge and personal hands-on experience of so many leading pathologists has been so succinctly presented.”

For more information about this title, go to:
